

This will be the first screen of the app, User can opt for ¹ any option. Neha is working on learning screen and Nitish on activity screen

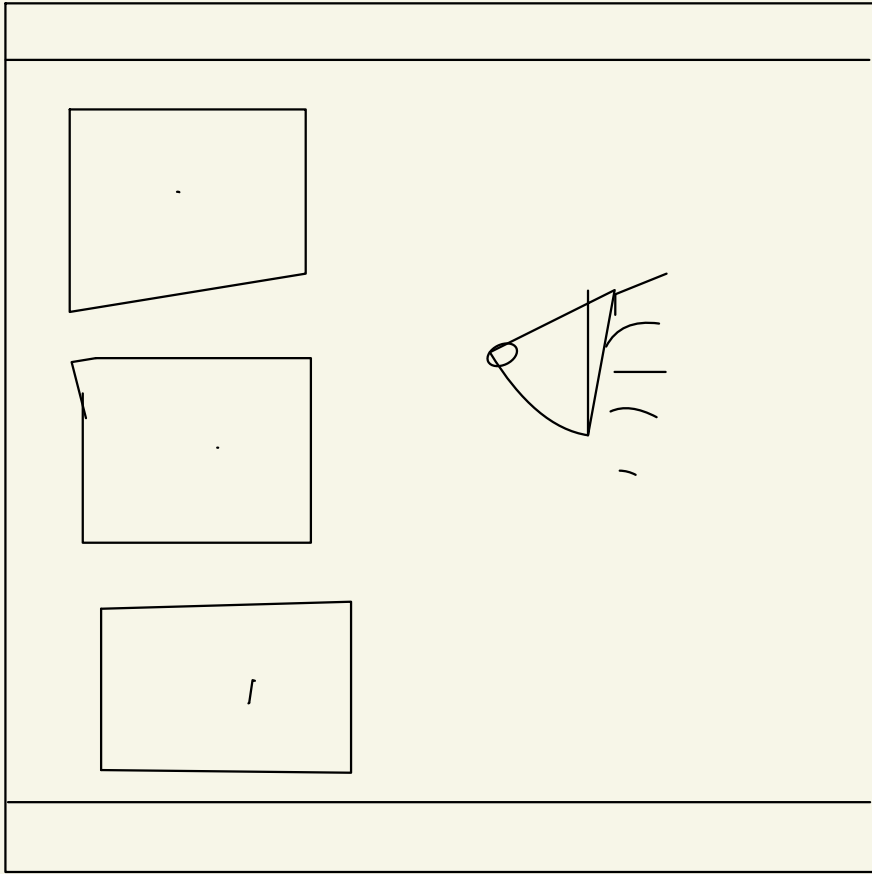

Screen for all the learning options . Animals, fruits, ² vegetables, colors, vehicles...etc
Background of these folder will be mix images. On click there would be sound and then next screen would appear

3

There could be multiple images of the same type.
If there are multiple images user can swipe right to left.

To be discarded
